1-3 Days Delivery Low Trading Prices Free Technical Advice Home zgt; Nuaira Faith Continuous Stream Extractor Fan Description Nuaira Faith Fan is a compact, quiet and attractive continuously running extract fan that provides energy efficient ventilation. With the well-being and comfort of the homeowner or tenants in mind, Faith technology provides continuous ventilation while maintaining the right amount of airflow. This is a low service fan with life cycle costs minimized. The ideal unfiltered fan for social housing This unfiltered fan meets all the requirements of social housing, providing a healthy environment, as well as complying with building regulations. The fan automatically adjusts its airflow to be fully compatible with part F and L building codes. This helps prevent problems with under-ventilated homes such as condensation, mold and poor indoor air quality. The Faith Extract fan combines stylish design with cutting-edge intellectual technology. The sensor ensures that the flow is constantly running, where it works continuously to maintain the desired environment. Faith also offers a daily run monitor as a standard to allow landlords to monitor operational use. Installing the Nuaira Faith Fan Nuaira Faith fan is easy to install and operate. It was designed with a DLO or contractor in mind, offering a simple setup and quick setting. You can set the humidity trigger point between the shutdown and 95%. Where to install Faith Fans: Faith extract fans can be installed through both the wall and ducts in the following areas: Kitchen Toilets Utility Rooms Ventilation Experience from Permagard If you need advice on which Nuaira fan extract or ventilation system best meets your needs, contact Permagard today on 0117 982 3282. You can also read our full guide to ventilation. Features: The cost-effective ventilation solution Low maintenance and lifecycle costs an energy-saving humidity tracker consistent with parts of the F L building codes Made from high quality, exposure and UV-resistant ABS. Unit fascia is removable for cleaning without the use of tools. A single-forward DC brush-free engine with locked rotor protection. The motor mounted on high-quality ball bearings. Fan double insulation: No land connection required. The speed of the trickle is selected: 4, 6, 8, 10, 13 hp or off. The ability to raise through the Switch Live (SL) connection or pull the cord. Price list: 136.80 EurosOnli: 124.99 euros VAT Customers who bought this product, also purchased the ventilation manufacturer Nuaira launched 'Faith', a new constantly working extract fan, developed specifically for social housing applications. A small but compact, new FAITH fan has the tool to ensure the flow works running at a time with a sensor to ensure established performance. Unlike some other continuous extract fans on the market, Faith can automatically adjust its airflow to maintain the developed responsibilities, allowing it to match the ADF 2010 (System 3) after installation. Even with its competitive price, Faith Extract fan comes with a number of sophisticated features. An intelligent and energy-saving humidity tracker that constantly measures the humidity level in the house and adjusts the fan accordingly - is ideal for tackling wet laundry, steamed bathrooms and cooking fumes. The advanced timer start mode further supports this by automatically working on the lifestyle of tenants. For tenants, the new faith extract fan is small and sleek, and, just as importantly, quiet in operation. Night delay and intelligent drive timer provides quiet work when tenants are asleep, as well as helping to save energy. Faith is available in versions 230V and SELV and is suitable for IPX4, for use in all areas within home ownership. The new Faith extract fan joins the full range of energy efficient domestic, commercial and renewable Nuaira ventilation solutions. Nuaira, based in the UK with more than 450 employees worldwide, has been at the forefront of the ventilation industry since 1966. For more information, please www.nuaira.co.uk or contact 02920858500. Sales director Andrew Sel explained: In the repair and maintenance sector, testing and commissioning of continuous fan production is regulated much less than in the new construction sector. Many continuous extract fans on the market are perceived to meet building codes, but when inspected, they often do not meet the required duty. As a result, the property is under-ventilated, leading to problems with mold, condensation and poor indoor air quality. We have developed a new Faith fan to overcome this widespread issue of non-compliance, giving social housing providers the peace of mind that their fan extract will meet Part F and L building regulations and protect both the property and the tenant from Sellman.
